Accidents and emergency treatment

Person responsible for checking and stocking first aid box: *Jade Humphrey*

The setting provides care for children and promotes health by ensuring emergency and first aid treatment is given as required. There are also procedures for managing food allergies in section 03 Food safety and nutrition.

- Parents' consent to emergency medical treatment consent on registration.
- All staff are paediatric first aiders and certificate are displayed within the premises. We take account the number of children, staff, staff breaks and the layout of our setting to ensure that a paediatric first aider is always available and are able to respond to emergencies.
- First Aid certificates are renewed at least every three years. In line with the EYFS 2024 all staff who obtained a level 2 and/or level 3 qualification since 30 June 2016 must obtain a PFA qualification within three months of starting work in order to be counted in ratios.
- All members of staff know the location of First Aid boxes, the contents of which are in line with St John's Ambulance recommendations as follows:
 - 20 individually wrapped sterile plasters (assorted sizes)
 - 2 sterile eye pads
 - 4 individually wrapped triangular bandages (preferably sterile)
 - 6 safety pins
 - 2 large, individually wrapped, sterile, un-medicated wound dressings
 - 6 medium, individually wrapped, sterile, un-medicated wound dressings
 - a pair of disposable gloves
 - adhesive tape
 - a plastic face shield (optional)

- No other item is stored in a First Aid box.
- In addition to the first aid box the setting provides disposable Vinyl single use gloves, aprons, cold compresses as well as a thermometer with covers.
- There is a named person in the setting who is responsible for checking and replenishing the First Aid Box contents.
- For minor injuries and accidents, First Aid treatment is given by a qualified first aider; the event is recorded in the setting's Accident Record book or digital recording system.
- In the event of minor injuries or accidents, parents are normally informed when they collect their child, unless the child is unduly upset or members of staff have any concerns about the injury. In which case they will contact the parent for clarification of what they would like to do, i.e. collect the child or take them home and seek further advice from their GP or NHS 111.

Serious accidents or injuries

- An ambulance is called for children requiring emergency treatment.
- First aid is given until the ambulance arrives on scene.
- The registration form is taken to the hospital with the child.
- Parents or carers are contacted and informed of what has happened and where their child is being taken to.
- The setting manager arranges for a taxi to take the child and carer to hospital for further checks, if deemed to be necessary.

Recording and reporting

- In the event of a serious accident, injury, or serious illness, the setting manager notifies the owner/trustees/committee using the correct procedure; Confidential Safeguarding Incident report form, or other agreed reporting format, as soon as possible.
- If required, a RIDDOR form is completed; one copy is sent to the parent, one for the child's file and one for the local authority Health and Safety Officer.
- The owners//trustees/committee are notified by the setting manager of any serious accident or injury to, or serious illness of, or the death of, any child whilst in their care in order to be able to notify Ofsted and any advice given will be acted upon. Notification to Ofsted is made as soon as is reasonably practicable and always within 14 days of the incident occurring. The designated person will, after consultation with the owners/directors/trustees, inform local child protection agencies of these events.
